EXPERIENCE

Web Development Intern

Unified Mentor – Remote

Jun 2023 – Jul 2023

- Completed Web Development Internship at LogiPool.
- Built responsive web pages, improved UI/UX using HTML, CSS, and JavaScript.
- Collaborated on projects using Git/GitHub.

SELF PROJECTS

Fly Mail – Full-Stack Email Application | MERN Stack

A secure, responsive, and full-featured email system.

- Developed backend using Node.js/Express.js and integrated with MongoDB.
- Implemented JWT-based authentication and secure user session handling.
- Created protected routes and added 2-factor authentication.
- Built a React frontend with dynamic state management.
- Implemented CRUD functionalities and built RESTful APIs.
- Styled components using React-Bootstrap.

BookBazaar – Full-Stack Book Store Application | Spring Boot & React.js

- Developed a secure and scalable book e-commerce platform with a Spring Boot backend using JWT authentication and JPA Repository for efficient data management.
- Built a responsive React.js frontend enabling users to browse books, manage carts, and place orders. Implemented RESTful APIs, role-based access control, and an admin panel for managing inventory.
